

Justin Russell, Corbin Curnutt, Zach Hoeing, Jacob
Davis, Bryce Woody

Client Information

- Joshua Kelly
- CEO of Full Court Analytics
- Director of Analytics at Purdue Fort Wayne

Mentor Feedback

- We talked about Clean Code and he gave us some feedback on how to go about doing it
- We said that we plan on using Firebase and he said that would be good
- We talked to him about using google to login through the website
- We also told him that Josh is purchasing the domain name.

Client Feedback

- He likes how everything is coming together with the website.
- He sent us figmas to help us with the layout of each page
- He showed us how he wanted the shot charts to look (different zones)
- He is going to purchase the domain name through Google

Iteration 4 Features

- Implement substitution feature on the annotator page
- Implement play-by-play feature
- Implement stat tracking for quarters
- Add Firebase
- Add more testing
- Start implementing shot charts

Team Work

- Bryce - Added more on annotator page, implemented Google sign in, and added more tables to the team stats page
- Justin - Implemented the single game stats feature, and some database management.
- Zach - Started implementing testing using Cypress
- Jacob - Helped with the YouTube API stuff and Google Oauth
- Corbin - Changing the Roster from a table to a Data Table
